NEW IRS Requirement
Over-the-Counter (OTC) Medicines Must be Prescribed

In March 2010 the Patient Protection and Affordable Care Act was signed into law.

As a result of this new Act, effective January 1, 2011, it is required that reimbursement for OTC medicines and drugs be accompanied by a physician’s prescription in order to be reimbursed under Health Flexible Spending Accounts (FSAs), Health Reimbursement Arrangements (HRAs) and Health Savings Accounts (HSAs).

OTC drugs and medicines will continue to be eligible for reimbursement from these benefit plans as long as the reimbursement request is accompanied by a doctor’s prescription.

As a general rule, any OTC drug or medicine that you take orally or topically will require a doctor’s prescription. For example, cough medicines, pain relievers, acid controllers, and diaper-rash ointment will require a doctor’s prescription.

NOTE: You can use the take care® Card to pay for OTC drugs and medicines only if a valid prescription is presented at the time of purchase, and the purchase is made at a pharmacy counter and dispensed as a prescription item.

To learn more and to view a list of common items that can and cannot be reimbursed without a doctor’s prescription, go to takecareWageWorks.com, click on the “employee” tab, then click on the “NEW RULES Regarding Over-the-Counter drugs” link.
