DTSDE Surveys for Parents, Teachers and Students: South Middle School

Results

School Year 2016-2017
**Purpose of the Study**

Gathering stakeholder feedback is an important part of developing any school or district improvement plan. New York requires focus school districts to engage their stakeholders with a Diagnostic Tool for School and District Effectiveness (DTSDE) Survey as they develop their improvement plans.

Newburgh Enlarged City School District asked parents, instructional staff members, and students for feedback on several key school and district topics to inform improvement efforts across the district and in every school.

K12 Insight partnered with David Brown, Director of Planning and Accountability, to develop the DTSDE Survey, which addressed the following six tenets:

- Curriculum Development and Support
- District Leadership and Capacity
- Family and Community Engagement
- School Leader Practices and Decisions
- Student Social and Emotional Developmental Health
- Teacher Practices and Decisions
Diagnostic Tool for School and District Effectiveness (DTSDE) Tenets

Curriculum Development and Support
The school has rigorous and coherent curricula and assessments that are appropriately aligned to the Common Core Learning Standards (CCLS) for all students and are modified for identified subgroups to maximize teacher instructional practices and student-learning outcomes.

District Leadership and Capacity
The district examines its schools' systems and makes intentional decisions to identify and provide critical expectations, supports, and structures in all areas of need so schools are able to respond to their community and ensure all students are successful.

Family and Community Engagement
The school creates a culture of partnership where families, community members, and school staff members work together to share the responsibility for student academic progress, social-emotional growth, and overall well-being.

School Leader Practices and Decisions
Visionary leaders create a school community and culture that leads to success, well-being, and high academic outcomes for all students via systems of continuous and sustainable school improvement.

Student Social and Emotional Developmental Health
The school community identifies, promotes, and supports social and emotional development by designing systems and experiences that lead to healthy relationships and a safe, respectful environment that is conducive to learning for all constituents.

Teacher Practices and Decisions
Teachers engage in strategic practices and decision making in order to address the gap between what students know and need to learn so that all students and pertinent subgroups experience consistently high levels of engagement, thinking, and achievement.
Understanding the Results

Participants learned about the Diagnostic Tool for School and District Effectiveness Survey via a letter to instructional staff, a letter to parents, and social media.

K12 Insight emailed individual invitations with survey links to district instructional staff members. Students used their student IDs to take the survey during school. Parents could access the survey via a public link on the district’s website. Paper surveys were available on request. The survey was open Sep. 12-29, 2016.

This report summarizes survey results and breaks them down by parents, instructional staff, and students. Additional school-level reports are available with this project.

Results do not reflect random sampling; therefore, they should not be generalized to all district parents, instructional staff members, and students. Rather, results reflect only the perceptions and opinions of survey participants.

Findings for each item in the report exclude participants who did not answer.
