Read Across America

RETURN CALENDAR TO NWS NO LATER THAN: MONDAY, FEB. 4th.

JANUARY 2019

Our next stop will be our country's first national park - Yellowstone National Park - established in 1872. Yellowstone is probably best known for its thousands of hot springs and more than 100 geysers that regularly shoot water and steam. Old Faithful, the most famous geyser in the world, erupts many times each day. Yellowstone is full of deer, elk, bison, and trumpeter swans to name a few. Native Americans traveled across the region for thousands of years before settlers even arrived. Yellowstone Lake is 8,000 feet above sea level. North of the lake, the Yellowstone River flows over two waterfalls and into the Grand Canyon.

Please read for 15 minutes minimum of 16 days each month and initial the boxes on the calendar

Sun	Mon	Tue	Wed	Thu	Fri	Sat
		1	2	3	4	5
